

>>> **Play, interact, cooperate, discover, and experience!**

Experience Workshop is a Finnish expert company of innovative education. With us anybody can **learn mathematics through the arts, and make art with mathematics**. Our aim is to involve children, parents and teachers into a vibrant and creative dialogue between the mathematical and artistic way of looking at the world.

>>> **Teacher training**

Experience Workshop offers online and offline **training in STEAM, multidisciplinary learning and Finnish education**. We also provide professional development programs and curriculum advisory training for all those people and institutions, who want to invest in their future.

>>> **Educational toolkits**

Experience Workshop's toolkits span **K-12 education**. Choose your school box and we round it up with a free online training course. Get to know **4DFrame, LUX, Poly-Universe, Itsphun, caraWonga** and other brands from our webshop www.learningbydoing.fi.

>>> **Research expertise**

Experience Workshop researches **STEM and STEAM education**; inquiry-based, cooperative, playful and experience-oriented mathematics education; connects hands-on activities with digital modeling; combines science and art; covers phenomenon-based and multidisciplinary learning. We **develop resources for teachers, parents and students**: books, methodological resources, scientific articles, a lot of which is available open-access.

>>> **About us**

Experience Workshop was launched as the collaborative effort of mathematicians, visual artists, teachers, parents and children in 2008. Over the years we have organized countless **math-art-education events, exhibitions, workshops, seminars and trainings all over Europe and Africa, America, Asia, Australia**. The members of our **international network** are teachers, artists, scholars, craftsmen and toymakers from all over the world.
